Ashvin Panicker

SENIOR SOFTWARE ENGINEER

Bengaluru, India · ashvin.panicker@gmail.com · ashvinpanicker.com · linkedin.com/in/ashvin-panicker

Senior Software Engineer with 8+ years building production-grade UIs, APIs, and data systems across fintech, logistics, and consumer products. Deep expertise in full-stack development - from design system to deployment. Track record of founding and growing a crypto fintech with experience in team leadership, fundraising, accelerator programs, and international markets.

EXPERIENCE

Founder, Software Consultant · **Tailgrab Digital LLP** *Bengaluru, India · Jan 2023 - Present*

- Delivered UI for Golftripz, a fintech golf rewards platform. Built the tee-times booking portal and rewards interface, enabling Kotak, ICICI, AU Small Finance Bank and IDFC credit card holders to redeem reward points at golf courses across India.
- Designed and built worldteamsgolf.com in Webflow, a tournament site for a premier international amateur golf series, with registration, event rules, and responsive mobile design.
- Built a full-stack hotel booking platform for Hotel Tashi Delek using React and Supabase Edge Functions, processing 360+ reservations since launch with active bookings to date.
- Launched and ranked a wordpress website for a boutique resort (Aqua Outback) to #1 on Google via organic SEO, driving a steady inbound stream of customers for "best kitesurfing in India".
- Founded stashkart.in, a Shopify print-on-demand platform with custom theme and Razorpay integration.

Senior Technology Analyst · **OakNorth Bank** *Bengaluru, India · Apr 2024 - Jun 2024*

- Built the loan drawdowns section of an internal assessment tool for Debt Finance Directors; established reusable React + TypeScript form components and a Storybook frontend component library adopted across the team.

Senior Software Engineer · **SuperProcure** *Kolkata, India · Sep 2020 - Dec 2022*

- Designed and shipped React analytics dashboards (PowerBI, Metabase, D3), improving data-driven decisions by 30% for enterprise logistics clients; integrated ElasticSearch for global product search.
- Led structured onboarding for 20+ engineers across 500+ technical interviews, growing team size from 12 engineers to 30+ engineers.

Co-Founder · **Lastbit / Striga** *Riga, Latvia · Mar 2018 - Sep 2020*

- Co-founded a crypto fintech; built the world's first non-custodial instant payments device and a Bitcoin Lightning-powered debit card launched across Europe, using React Native and Node.js.
- Raised $5.71M across multiple rounds; Berkeley SkyDeck and Y Combinator alumni. Built a cloud-agnostic Terraform toolkit (AWS + GCP) cutting deployment time by 60%. Acquired by Lightspark, 2025.

Software Engineer · **DSquare Solutions** *Bengaluru, India · Aug 2016 - Feb 2018*

- Rebuilt flagship Web Analytics SaaS from jQuery + Sencha UI to a responsive React + Redux + D3.js web app. (Acquired by Hansa Cequity.)
